

RESEARCH ASSISTANT

MOUNT SINAI SCHOOL OF MEDICINE IMMUNOLOGY INSTITUTE, NEW YORK CITY

PI: Cerutti, Andrea. M.D

Two research assistants are needed immediately in the Mucosal Immunology Laboratory, Immunology Institute, MSSM, New York, NY.

The research in our laboratory is focused on innate immune regulation of B cells. Cell culture systems, animal models, as well as specimens from human subjects are routinely used in our studies.

More information about research projects in the lab can be found through web link:

Minimum requirements for this position include a B.A. or M.S. (or FP II) and previous experience in research laboratory, including skills in cellular and molecular biology techniques (e.g. cell culture, RT-PCR, Western blotting, ELISA, etc.) and the ability to perform experiments and analyze data independently. This position is intended for highly motivated candidates who are keen to work hard in a multidisciplinary environment in our newly established laboratory. Interested candidates should submit an electronic copy of their CV, along with their complete contact information, three references, and a cover letter briefly describing their past research experience and career goals to:

Alejo Chorny, PhD

alejo.chorny@mssm.edu

Salary for this position will be negotiable depending on experience and qualification.
